Report On Tree Plantation programme

Our Rotaract club at Sriram Engineering College organized a Tree Plantation programme on the occasion of World Rotaract Week and Women's Day. Through this special environmental awareness drive, the club has reaffirmed its sincere commitment to furthering the goal of Green Earth. All Rotaract student members and faculty members participated in this programme. The guest of honor for this tree plantation programme was our respected Principal, Dr. C. P. Karthikeyan. The aim of the programme is to plant a total of 100 saplings on the college campus. One by one, students and teachers started planting saplings. First, we started planting saplings in the garden of our college campus. Students also made some posters and banners on the importance of tree plantations. We hope that everybody plants a tree in their lifetime and contributes to conserving nature. I would like to thank our principal, our Rotaract team, the faculty members, and the garden workers for their enthusiastic participation in making this initiative a success.
